Job Position – Senior Planner

Xilinx Asia Pacific Pte Ltd is a world leader in the semiconductor industry. Xilinx programmable solutions are everywhere - from storage networks to communications, HDTV, broadcasting, medical, automotive and more. Xilinx has major facilities in California, Colorado, Ireland and Singapore with more than 30 offices throughout North America, Europe, Asia and Japan.

Our culture is designed to help you succeed. We take pride in nurturing innovation and providing our employees with a value-driven and rewarding workplace.

Senior Planner (IRC32351)

Job Description:

- Responsible for all planning-related activities for the Materials Planning function.
- Take overall ownership for total material spend with particular emphasis on maximizing service levels and minimizing E&O by managing risk.
- Carry out detailed supply demand analysis in order to identify excess or constraint situations and to act accordingly.
- Drive improvements with various groups within the organization to ensure that all variables relating to supply and demand are understood and modelled correctly into the planning systems.
- Develop and implement initiatives to drive optimum levels of material supply with a view to minimizing inventory without impacting customer service levels.
- Drive systematic process improvements based data driven and root cause analysis with a particular focus on process automation.
- Identification, development and implementation of new and existing current inventory & planning models.
- Work with global suppliers to execute requirements plans and track work in progress.

Job Requirements

- Must have a Bachelor's or Master's Degree in Supply Chain Management, Operations Research, Statistics, Industrial Engineering, Computer Science, Mechanical Engineering or MBA with related background; SIPMM qualifications would be an added advantage.
- Should have more than 8 years of supply chain experience with a proven track record in a dynamic data-driven business environment.
- Must have proven track record in demonstrating strong leadership skills and have a proven ability to drive systematic change inside and outside own function.
- Demonstrated ability to develop innovate systematic solutions.
- Ability to work well across multiple levels of a global organization within operations and with external suppliers.
- Strong analytical skills, combined with practical business acumen.
- Sound knowledge of forecasting, inventory management and materials planning.
- Ability to manage multiple tasks within tight deadlines.
- Motivated, self-starting and ambitious.
- Excellent interpersonal and communications skills.
- Working knowledge in data analysis tools (Advanced Excel, Access) and supply chain applications (Oracle).

If you meet these requirements, you should consider joining the Xilinx Team and launch your new career on the leading edge of technology with the World Leader of Programmable Logic.
